

Loop Animation - Figma

1. Take and prepare a image with required state

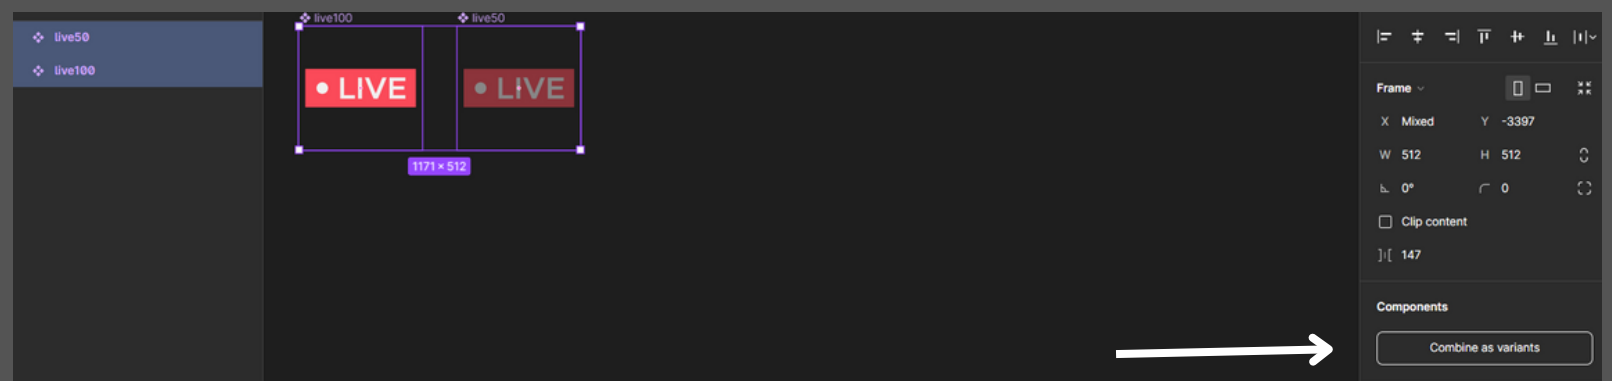

Since in my case both image have only difference on Transparency, I taken the same image copy and reduced the transparency on figma itself.

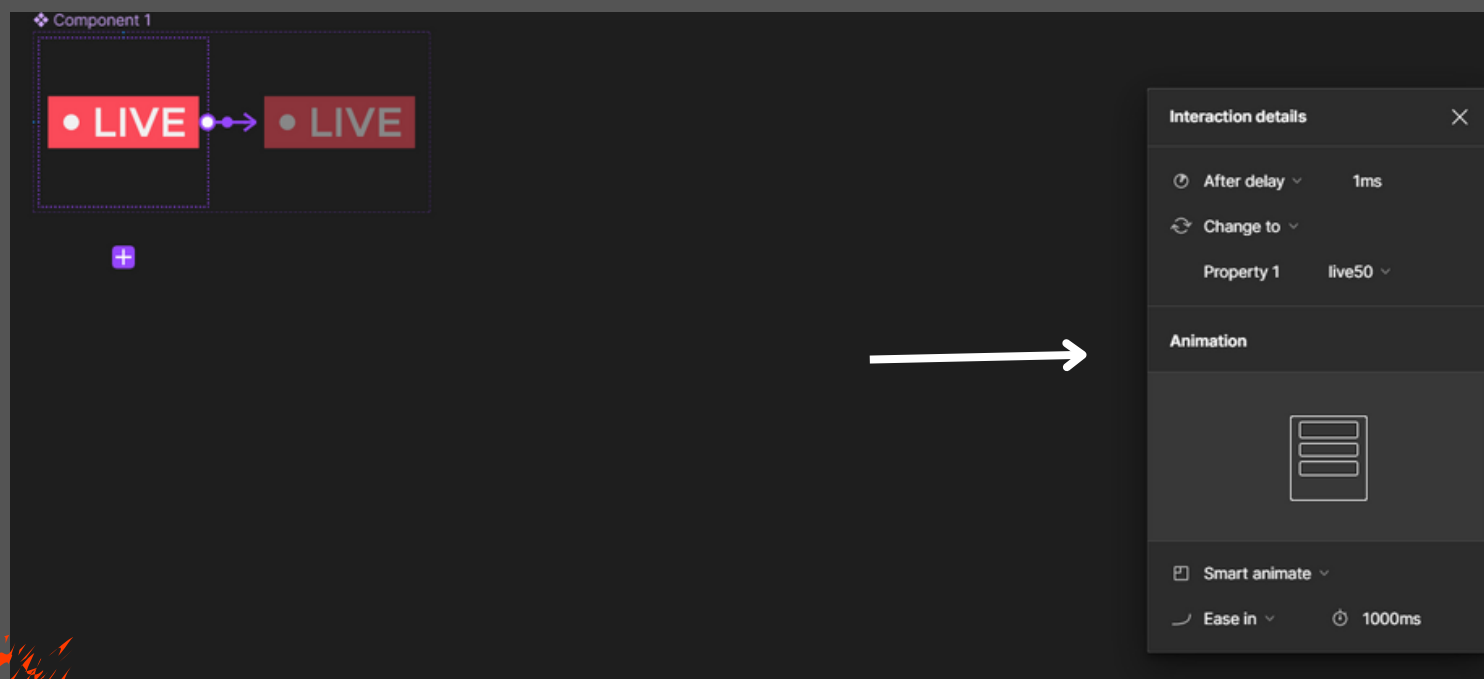

2. Create each image as component (Ctrl + Alt + K)

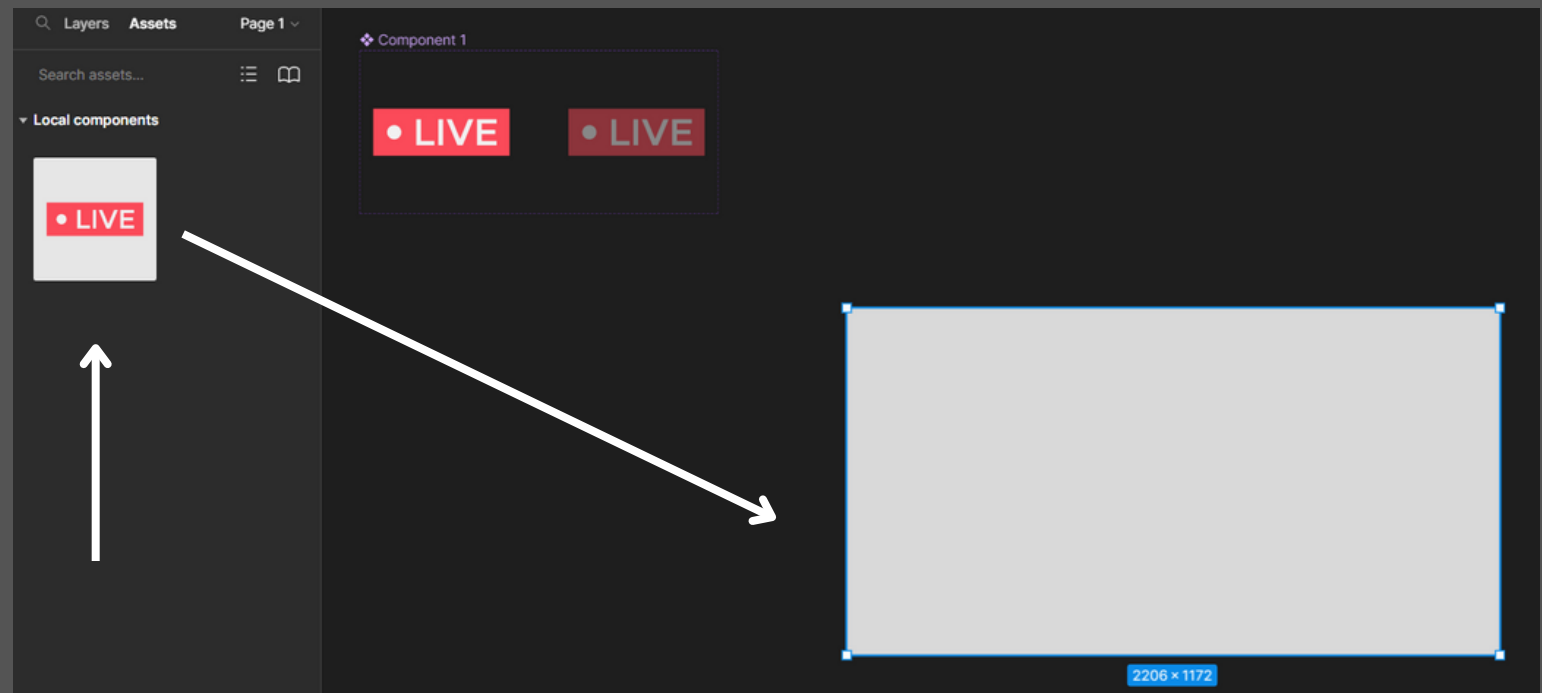

3. Select All Image component by holding shift and combine as variants

4. After that make prototype connection between two with following properties.

5. Go to Assets Tab. Drag and drop the following asset into required frame

6. Execute the prototype. Our loop animation is ready
