Overlay in Figma
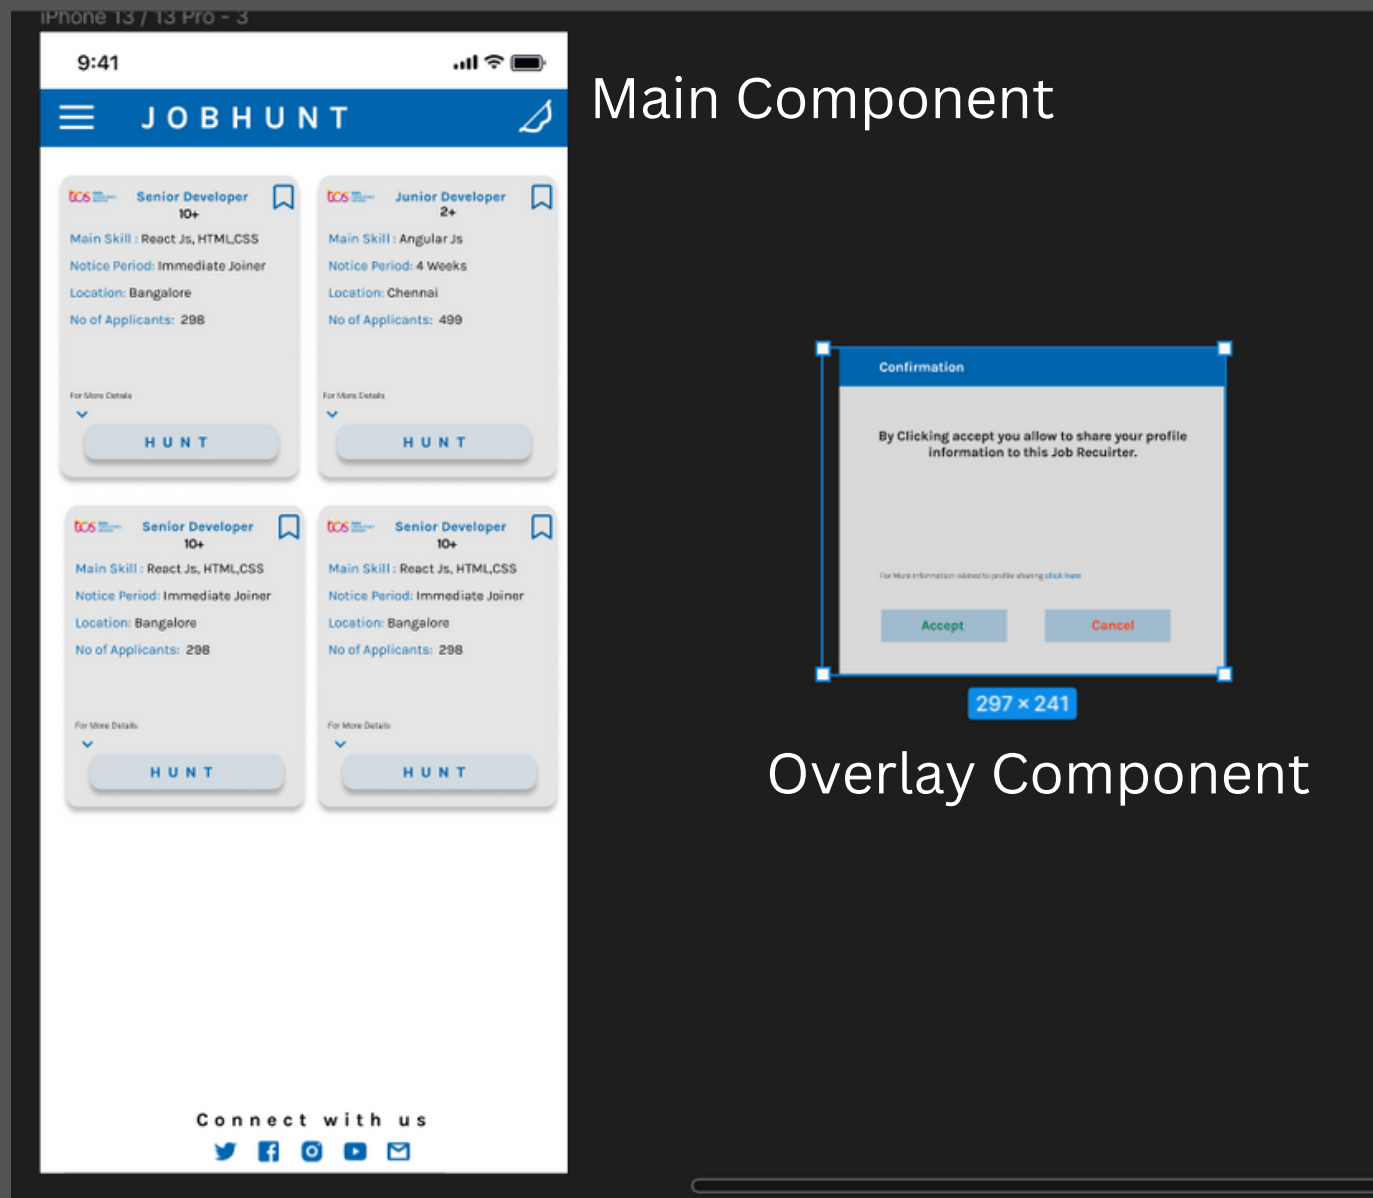

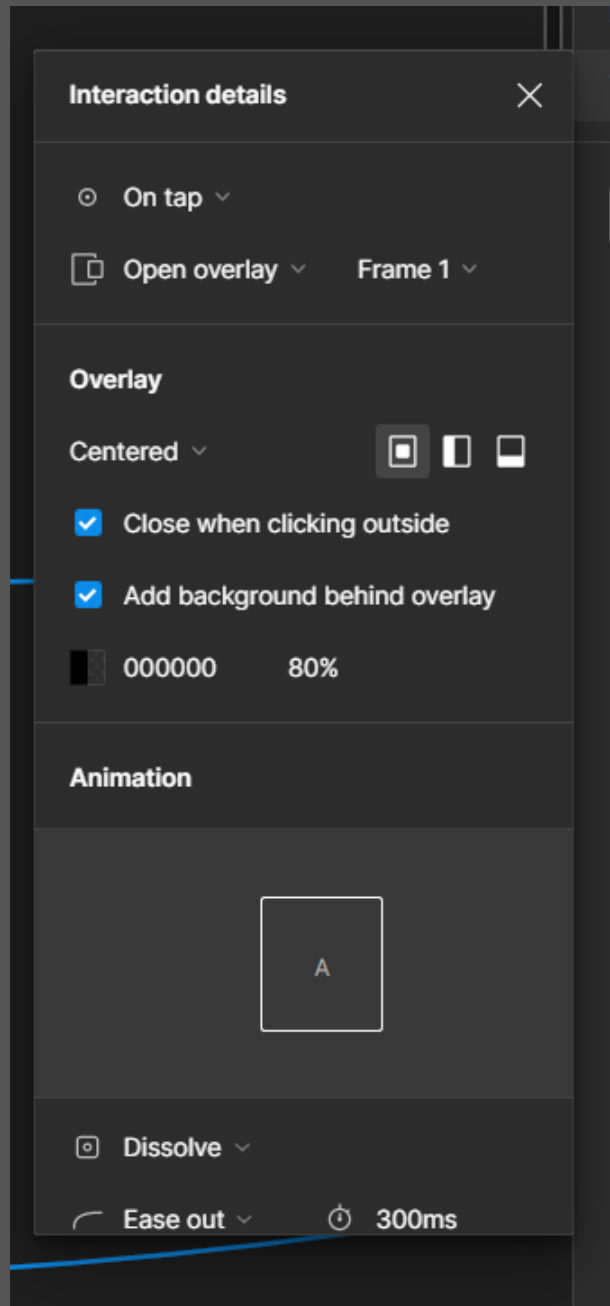

In this post we will see how to add overlay popup in figma.

1.Create a overlay Compoent as seperate frame like this

Main Component

Overlay Component

My Requirement is when someone click on hunt, the popup appears will ask whether you are okay to share profile information.
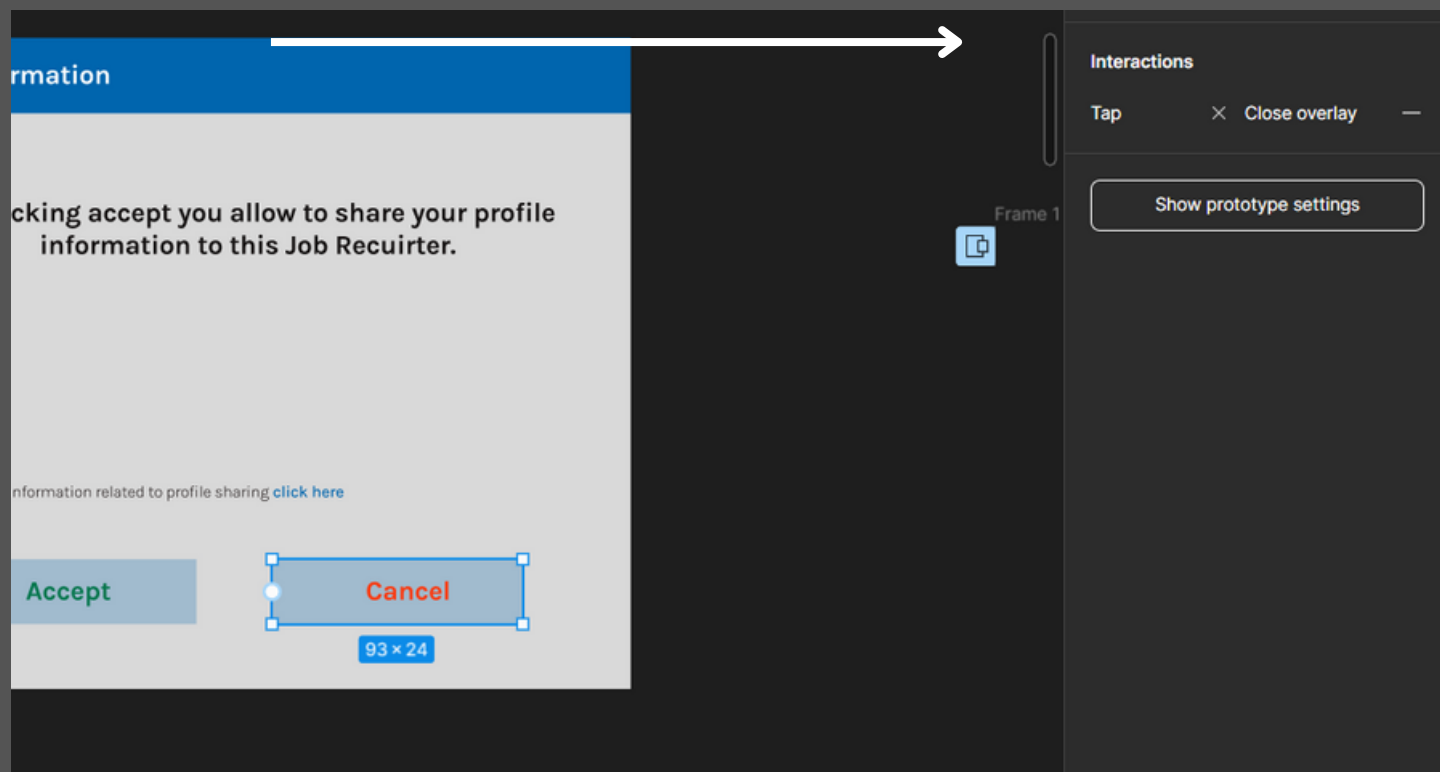

2. Make Prototype Connection with following settings

Interaction details ×

On tap ∨

Open overlay ∨   Frame 1 ∨

Overlay

Centered ∨

☑ Close when clicking outside

☑ Add background behind overlay

000000   80%

Animation

A

Dissolve ∨

Ease out ∨   300ms

1. Close when clicking outside, if it is checked when you click or tap outside the popup it will be close
2. Add Background behind overlay will add one overlay layer between main and popup frame with required color and transparency.

3. Self Destruction of Popup when click on cancel.

When You click on cancel, the popup have to close. For this self prototype settings is enabled. When on click or tap, we are saying to close the overlay

FIGMA

4. Output
